### **DETAILED ACTION**

Claims 2-5, 13, 17, 18, 20, 21, 23 and 26-30 are directed to an allowable product.

Pursuant to the procedures set forth in MPEP § 821.04(B), claims 6-12, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 10/12/06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### **REASONS FOR ALLOWANCE**

Applicant's amendment, filed 05/19/10 has overcome the rejections of the prior office action mailed 03/18/10.

The following is an examiner's statement of reasons for allowance: The examiner has found claims 2-13, 17, 18, 20, 21, 23 and 26-30 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record.

The present invention relates to a support material consisting essentially of a cross-linked polymer compound in a three-dimensional network, comprising a radical of a given general formula (II), wherein the radical of general formulae (II) is bound to at least one osidic chiral unit of a linear, branched or cyclic linkage of a polysaccharide or oligosaccharide derivative according to a given general formula (VIII), wherein said polymer compound is intermolecularly, cross-linked in a tri-dimensional network and is insoluble in polar organic solvents, and optionally containing a mineral or an organic support material. Also, the present invention relates to a method of preparing said material. However, the method of the instant invention is not taught or suggested in the prior art, nor is obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
